Fabled History of the First Riddle.

The ancients believed that the monster Sphynx was the inventor of riddles. The one she proposed for solution is this: "What animal is that which goes upon four legs in the morning, upon two at noon and upon three at night?" Many persons strove to explain it, but failed and were torn to pieces by her. At length Oedipus solved it by saying that the animal was a man, who, in infancy, or in the morning of his life, creeps upon his hands and feet and so goes upon all fours; in the noon of his life walks on two feet, and in the night of old age requires a stick and so totters upon three legs.

No. 1.—Picture Puzzle.

No. 2.—Enigma in Rhyme.

Green am I in spring,
Late in summer yellow;
In the autumn red,
When the days grow mellow.

You may on me read;
You may on me write;
Green, red, yellow, though I am,
I am always white.

Wrinkle not my face;
Let me live in clover;
Look, but handle not;
Yes, you may turn me over.

No. 3.—Arithmetic Tangle.

A countrywoman carrying eggs to a garrison, where she had three guards to pass, sold to the first guard half the number she had and half an egg more; to the second, the half of what remained and half an egg beside, and to the third guard, she sold the half of the remainder and half another egg. When she arrived at the market place she had three dozen still to sell; how was this possible without breaking any of the eggs?

- How do we know that Byron never wore a wig?
- Why is the leaf of a tree like the human body?
- Which is the oldest tree in England?
- Why are feet like olden tales?
- Why is a spider a good correspondent?
- Why is a thief, picking a coiner's pocket, reminded of a line in Othello?
- Why is an undutiful son like one born deaf?

1090781

(h) Why are the pages of a book like the days of a man?

(i) How many sides are there to a tree!

(j) Why is your nose like St. Paul's?

(k) What's that which every living man hath seen, but nevermore will see again, I ween!

A Metamorphosis.

What a wonderful letter is N. Beside making a window of widow, it metamorphoses a leviathan into two well known Jews, Levi N-athan; makes a bungle of a bugle; Norma, a Norman, and even causes a modest violet to be violent.

One of the nicest uses to put an N to is to change an eclipse into necklips, which charms, on a pretty woman, eclipse many others.

A Riddle Answered.

"What is the difference between a widow and a window?" You give it up. I knew you would! Well, there is little if any, for the transparent griefs like the transparent panes of the other are removed in course of repairing, and the latter is for mankind to look out of, while the former looks out for mankind.

Paniana.

Some one says that laundresses, like railroads, have their irons all over the country, and occasionally do a little mangling; but this, you know, is speaking ironically.

Is anything worse than the Englishman in Paris, who said he guessed a certain French lady to be mad, as her husband continually addressed her as March hare (Ma chere).

Theodore Hook was once asked to review a book called "Three Words to a Drunkard." "That I will do in three words," he said. "Pass the bottle!"

Motto for grocers: "Honest tea is the best policy."

Where is the ruffian who said, "My notion of a wife at forty is that one should be able to change her, like a bank note, for two twenties."

Talking of a woman at forty, makes us think how funny it is that a woman who never knows her own age, can tell you in a minute the age of all her female acquaintances.

It was the original learned pig who made this observation, when running away from the pork butcher, "Prevention is better than cure."

Learn in your youth to beehive through life, with the regularity and industry of the bee; and then, as you kettle little holder, you will not get into hot water through bad habits, and burn your fingers.

Dream Interpretations.

One or two dream interpretations that may be useful some day: To dream of a policeman is a sure sign of the "blues." To dream you are a monkey is—to say the least—suggestive. To dream your head is being punched, and, on waking, to discover that such is not the case, is—lucky for you. To dream you have eloped with a wicked female ghost is a sure sign you have taken bad spirits (over night). If a "gentleman of the press" dreams of donkeys, it is called a "nedy-torial" vision. To dream of suet shows a fat-nous mind (don't do it again).

Double Acrostic.

L	amps in millions,	L	ights on billions,
O	n the earth	O	mnipotent;
N	ever conquered,	N	ever failing,
D	ayvlish pleasant,	D	em magnificent.
O	nly shame 'tis,	O	'er Thames sailing,
N	oses smell such	N	asty stiff scent.

No. 6.—Anagrams.

For the benefit of very young readers we will explain that making an anagram consists in forming a new word or words from the letters of other words. An illustration is: Cheer sick lands—the anagram for Charles Dickens. We now invite you, with the permission of Good Housekeeping, to an anagrammatical Dickens party, the guests of which are prominent characters in Dickens' writings: Blame Crumple; We debtor to toys; Clever top I did pad; Pair my ages; His by a linen clock; Toy lily blows; Canny Skyes; Mere Walls; O, feel my corn bed; We kill red vics; Over it wilts; Bug ran by dear.

No. 7.—Enigma.

I am a word of four letters, two of which are of no importance, signifying nought. For myself, I am an article of extended use, and worn by a lady, a friar, a snake, a clergyman, a flower and a bird. I gave a surname to a famous archer who lived about the time of Richard I, and to a poet of the reign of Victoria. My family is large, though I am an orphan, for when I go among them, I can count sisters and brothers, maidens and mothers. I am somewhat addicted to single life, for I dwell with spinsters; yet I am fond of society, for where a great many neighbors dwell together you will always find me. I am rather of a monastic turn, too, and have patronized Beguines, and Sœurs de Charite, Capuchins and Franciscans. Kings and queens favor me, however, when I assume knightly orders, and I flourish highest under their protection. Wherever I am I am at least sure of subsistence. In all probability you have seen my like, but even when you find me you may be puzzled, for I often show two faces.

No. 8.—A Riddle in Rhyme.

I am borne on the gale in the stillness of night,
 A sentinel's signal that all is not right.
 I am not a swallow, yet skim o'er the wave;
 I am not a doctor, yet patients I save;
 When the sapling has grown to a flourishing tree
 It finds a protector henceforward in me?

No. 9.—Pictorial Rebus.

No. 10.—Syncopeations.

Syncopeate (by omitting one letter in the middle of the word) to wander, and leave to stand still; to enslave, and leave part of the face; a drink, and leave a ditch; to sail near the shore, and leave detriment; lively, and leave saucy; to divide and leave a prophet; tumult, and leave part of the face; to cudgel, and leave to lessen.

The syncopeated words are all of equal length, and the letters taken from them, placed in order, name something seldom met with.—Wide Awake.

No. 11.—Poetical Charade.

My second sweepeth clean, 'tis said,
 When new; but housewives say
 That 'tis no good when constant use
 Hath worn its strength away.
 Ah, lazy son, your algebra
 You've very badly reckoned;
 My first shall point my whole for you
 In likeness of my second.

No. 18.—An Enigma in prose.

I am a news vendor. I tell of births, marriages, and deaths. I invite people to dinner, and carry their refusals. I send people abroad, and order their return. Through me, buying, selling and bartering are frequently accomplished. I speak the most polished language and the roughest tongue. I am generally white, often blue, and some-

times of the most delicate tints. I am sometimes used with care, but more frequently receive little or none, and am often destroyed. I am also heard in the song of the nightingale and the melody of the blackbird. Musical instruments are useless without me, and I am the foundation of the musician's art.

You know that TOTAL is a crime,
With a sentence the criminal fears
And, when convicted, serves a term
In jail of twenty years.—Golden Days.

No. 21.—Rebus.

I am a word of five letters only; but if you take a lesson from bell ringers and play the changes upon me, my combinations are infinite. My original word as it stands, spelled with three consonants and two vowels, signifies a weapon formerly in great repute, and still of much use with savage nations. Transpose me, and I give you some fruit of a wholesome and delicious nature, chiefly imported from Guernsey and Jersey. Cut off one letter, and I give you a seed; transpose me, and I cut your corn; again, and I peel your fruit. Alter the letter, and I present a large form of the monkey tribe to you, which, if you transpose again, you will convert into a very largely used leguminous food. Alter the letter again, and you will have the organs of a sense; transpose, and you level me to the ground again, and you mark me with scars. Alter my letters again, and I grate for you, when, if you behead me, I become a poisonous reptile. Alter the letters again, and I go upon "Change;" transpose me, and

I speak to a "medium." Alter me three times more and I become successively the materials for a dress, the blood of a plant, and what you must be. Finally, use my whole five letters once more, and if you are accustomed to the very useful grammatical exercise they show you, I think you ought to be able to make out all my meanings.

Like anything you please—depend on it.
I've said it twice, so, in a thrice,
Resolve my whole and make an end on it.

While he was trying to explain the meaning of the word, a small covered boat hove in sight. Seizing upon the incident for illustration, he exclaimed: "If I were to tell you that there was a leg of mutton in that boat, you would believe me, would you not, without even see-

ing it for yourselves? "Yes, sir," replied the scholars. "Well, that is faith," said the teacher. The next day, in order to test their recollection of the lesson, he inquired: "What is faith?" "A leg of mutton in a boat," was the answer, shouted from all parts of the school. Good boys!

Where'er you wish to go.

No. 50.—Word Pyramid.

Arrange the word septuagenarian in a column of letters thus:

And then tell a story of old age, or make some remarks on old age, so that the whole will form a pyramid, with twice as many letters as P but one at the bottom as there are in the word itself, namely, twice fourteen wanting one, that is, twenty-seven. The letter S must remain alone, being the apex; the next letter, E, must have one letter on each side of it; P must have two on each side; T three on each side, and so on, until you arrive at N, the last letter, which must have thirteen letters on each side of it. The whole must form a connected sentence, having reference, as we said before, to the condition of old age.

 And the curtains, cozy and warm,

 With the help of my lady Jane
 And an ivory ball; and they missed and laughed,
 Then tried the trick over again.

But my first is ready, my second waltz.
 On the ground all the playthings roll,
 And the children, tired out with their game,
 Are taking my first from my whole.

No. 64.—A Spring Time Pyramid.

Arrange as a pyramid the sentence below, and find out the word which reaches from the point to the foundation stone. It will be found to be a spring tide festival, suitable more or less to the subject of the sentence:

"Sweet spring at last is bursting the Arctic chains. Genial breezes refresh us sometimes. The snow drop is gone. It has given place to the many later favorites, as daffodils and primroses. Birds, such as we all do love, provide music rare, and we should be joyful indeed were it not that we know winter departs not with the daffodils. Rude blasts have yet to roar around the garden. Fly away, winter! fly away!"

N. B.—Great care must be taken to arrange all the letters in strictly level lines, and the letters of each line must be exactly below those of the line above, and exactly above those in the lines below, or confusion will be the result. No 66.—Arithmetical Puzzle.

There was a poor man called Johannes Bull,
 Who children did possess, a quiver full;
 And who yet managed somehow to scratch on,
 By the true help of daughter and of son.
 Six little workers had he, each of whom
 Earned something for the household at the loom.
 I will not tell you how much each did gain,
 For I'm a puzzler, and I don't speak plain;
 But, as I would you should possess a clew,
 Some tell tale facts I'll now disclose to you.
 Week after week, Jané, Ann, Joe, Bet, Rose, Jim,
 Earn ten and tenpence, father says, for him,
 And in this way: The eldest daughter, Jane,
 Gains sevenpence more than sister Ann can gain;
 Ann eightpence more than Joe; while Joe can get
 By his endeavors sixpence more than Bet;
 Bet, not so old, earns not so much as those,
 But by her hands gets fourpence more than Rose;
 Rose, though not up to Jane, yet means to thrive,
 And every week beats Jim by pennies five.

Now, say what each child worker should receive
 When father draws the cash on pay day eve?

 And changes yet more strange shall I sustain,
 As thus: a heap of copper I become,

 Cash am I still, and mount to £ s. d.
 But pounds and shillings, yea, and pennies fall,
 If u r y are tacked upon my tail.

I am a word of three letters, an animal's
 name. Add a planet to me, and you will dis-
 cover Sirius. Take it away, and replace it
 with a flower, and you will discover the ex-
 quisito pink tinted wild rose of the hedges.
 Change it once more and link me to another
 order and you will perceive a purple scent-
 less blossom. Substitute a fish, and you will
 find in me one of the lesser shark tribe. Add me
 to the 4th of July and 11th of August inclu-
 sive, and I shall represent the hottest season.
 Add four letters to me, and I will recite the
 worst of bad verse to you; replace these by
 three other letters, and I will show you a
 stubborn disposition; alter these to two others,
 and I represent a tenet. Set me on fire and
 I give you an ancient form of grate. In my
 crude form I am the recognized emblem of

fidelity, and am monumentally represented so. I am the guardian of your flocks and herds, and of your threshold, under which guise I am represented at Pompeii. I follow your steps with pertinacity, am oftentimes slain in your service, and sometimes by your own hand. I rescue you from fire, water and snow. I get to the lowest depth of weariness in your behalf, and yet your gratitude is evinced by making my name a mere byword of reproach.

No. 75.—For Wise Heads.

Take twenty lines, and put in the first something hot and comfortable, though dangerous.

In the second write down Abram's home of old.

In the third we will have the light of the body.

In the fourth set down a very base word.

In the fifth put what no one likes, or ever will.

Jot down for your sixth word what is on every thorn.

And for your seventh lay down two-thirds of half a dozen.

While three-fourths of an arch shall be your eighth word.

The ninth is the earliest navigator we know of.

The tenth is how best to prosper.

The eleventh is a slang word for something to eat.

And the twelfth is our own noble selves.

We ought to eschew the thirteenth.

While the fourteenth we need not eschew if we are temperate, but it is often dangerous like number one.

The fifteenth word is two-thirds of our mother.

The sixteenth is a girl's name.

And the seventeenth a thing's designation.

The eighteenth is half a nose.

The nineteenth no man ever saw the end of.

In the twentieth and last place, or line, write down what you ought never to be—never, never, never!

When these are set down one beneath another, read the first letters, and you will find the two great factions, or parties, who divided Italy and Germany so much in the Middle Ages; and by reading the last letters you will find a most useful building, erected by Charles II, where better work is done than slitting throats for barren glory.

What a distressing thing it is, as some one has said, that there are men who positively can't, any one of them, open their mouths without putting their foot in it.

Some one asks: What is the difference between a coat and a baby? To which the answer has been given: The one I wear, the other I was. A punster adds: That, ah! must be the reason why, ah! ladies like them both, as they are all given to, ah! pet a baby, also, to a(h)! pet-a-coat.

An Old Proverb Revised.

"Early to bed, and early to rise, makes a man healthy, wealthy and wise." That's what you say really; well, we're not quite so sure of this, but there is one thing we are quite decided about, namely:

Go to bed late, and get up again early,
Makes a man stupid, seedy and surly.

It's all right; we've tried it.

Do You See It?

A lady who was often visited by a gentleman, sometimes at rather unseemly hours even, was asked if he were—ahem!—any relation. She replied: "That gentleman's mother is my mother's only child." Do you see it? He was her son—her male child—her offspring.

No Temptation.

"And so you have brought my beautiful Alphonso home, have you, like an honest man, instead of keeping him yourself, as you might easily have done!" said the delighted lady as she fondled the poodle. "Were you not strongly tempted to keep the darling creature?"

No. 81.—Who or What Was It and Where?

God made Adam out of dust,
But thought best to make me first,
So I was made before the man,
To answer God's most holy plan.
My body he did make complete,
But without Legs or Arms or Feet,
I did my Maker's laws obey;
From them I never went astray,
But God did something in me see,
And put a living soul in me,
That soul of me my God did claim,
And when from me that soul had fled,
I was the same as when first made,
And without hands or feet or soul,
I travel now from pole to pole.
To fallen man I give great light.
Thousands of people, young and old,
May, by my death, great light behold;
To heaven I can never go,
Nor to the grave or hell below.

Permit me, madam, with the profoundest
respect, for once to come uncalled into your
presence, and, by dividing myself, add
greatly to my consequence.

So exalted am I in the character of my
first that I have trampled upon the pride of
kings, and the greatest potentates upon earth
have bowed down to embrace me, yet
the dirtiest kennel, in the dirtiest street, is
not too foul to have me for its inmate.

In my second, what infinite variety? I am
rich as the eastern nabob, yet poor as the
weeping object of your benevolence; I am
mild and gentle as the spring, yet savage as
the wintry blast; I am young, beautiful and
blooming, yet deformed and wretched. From
the highest authority, madam, I dare prove
I am your superior, though few are the in-
stances that prove it, and ten thousand the
proofs against it. I am—; but you are
tired, and wish my reunion; it is done, and
my consequence is lost, and I have no other
merit than remaining, as at first, your most
obedient servant, _____ THE WHOLE.

No. 105.—The Carpenter's Puzzle.

A ship having sprung a leak at sea, and being in great danger, the carpenter could find nothing to mend it with except a piece of wood of which the accompanying cut is a correct representation. The black dots in it represent holes in the wood, thus apparently preventing him from cutting out of it the sized piece he wanted, which was exactly one-fourth of its own size, having no holes in it. Can you tell how the square piece was cut from the board?

No. 107.—Enigma.

Things in my first are always told,
My second smacks of matters old,
My third is ever bought and sold
In shops or in the market cold.

Or, if you like it, on a stalk,
When in the summer fields you walk,
My first you'll notice, ripening fast;
My next's an adverb of the past;
My third in mart or ware house stands,
And is forever changing hands;
My whole it has a luckless lot,
It almost always goes to pot.

No. 109.—A Riddle in Rhyme.

We are little airy creatures,
Each have different forms and features;
One of us in glass is set,
Another you will find in jet;
A third, less bright, is set in tin,
A fourth a shining box within;
And the fifth, if you pursue,
It will never fly from you.

No. 110.—A Remarkable Monogram.

You are requested to state what word it is, of only three syllables, which combines in it twenty-six letters. While you are considering an answer to this conundrum, your attention is called to the picture above, of the gentleman with the parasol and hand port-manteau. It presents a monogram of the whole twenty-six letters of the alphabet,

none of which are turned backward. To a quick mind it also suggests a reply to the opening query.

No. 113.—Enigma.

I may be either alive, dead, or inanimate. In the first case I can be either curved, straight, or crumpled; in the second I may be of any form, but especially hollow; in my last my appearance is rather circumscribed, but it is the most pleasing of my forms. I wear no coat, yet sometimes I have a button, and a cape is named after me. I have no head, but am possessed of a mouth, and sometimes of a tongue, and can give utterance to sounds without the latter; and, truly, I must be a poor one of my kind if I cannot speak. In one sense I am generally in pairs, and in another never can appear in more than twenty-six weeks of the year. I can, when alive, inflict severe wounds; and when inanimate, in bad hands, can cause pain (to the ear). In one sense I give light, in another I protect it. I am not averse to gayety, for I used often to appear at festive boards; no band is complete without me, and I am often mentioned in connection with plenty. But for all this, in my natural state I am sometimes rough, always sharp, and have been the death of several people, and a place merely bearing my name seemed to have such terrors as to cause a gallant captain to desist from his voyage.

No. 116.—A Transposition.

A gentleman who was paying his addresses to a lady, at length summoned up sufficient courage to ask if they were agreeable to her, and whether he might flatter himself with a chance of ultimate success. The lady replied, "Stripes!" telling the gentleman to transpose the letters so as to form out of them another word, which word was her answer. The reader who can find out the word needs never fear being nonplused by a lady; those who cannot must either persist till they overcome the difficulty or may give up all thoughts of wooing.

No. 119.—Word Building.

I am a dog, a dog of low degree;
There is, I'm told, no noble blood in me;
So, settle that much in your mind, my boy,
Then puzzle out the name that I enjoy.

To aid you in your labors, let me say,
Add *e*, and every sickness flies away;
Turn *e* to *i*, and then at once you'll see
What the waves do when winds blow fresh and free.

If you remove them both, and add a *few*,
It brings a bell of eventide to view;
Or if, instead, you do append an *ate*,
A clergyman appears as sure as fate.
If you would turn me into cheese, add *d*,
If you would shorten me, 'tis done with *t*.
If you're a horseman, *b* will help you guide
The gallant quadruped which you bestride.
More I could say, no doubt, but I refrain;
I've said enough to make my secret plain.

No. 120.—A Box Puzzle.

A boy made a box and divided it into several compartments. The sides and partitions were alike, the floor was different. The cover was decorated with a picture representing the shore of a certain tropical country. The boy painted the box the color of his own eyes. He put in it a common table luxury, a summer garden vegetable, fruit of a foreign tree, and a very bitter substance. What nuts are represented by the box, its sides, picture, color and contents?

No. 124.—Riddle.

Four people sat down in one evening to play;
They played all that eve and parted next day.
Could you think when you're told, as thus
they all sat,
No other played with them nor was there

Yet when they rose up each gained a guinea,
Though none of them lost to the amount of a
penny.

Great K, little K and K in a merry mood

Major-ca, Minor-ca and Ameri-ca.

What a pity it is when lovers fall out, isn't it? To think that hot words should produce a coolness! But, you know, everybody is liable to the unpleasant vicissitudes of life. Even an oyster, which is one of the most placid of creatures, is liable to get into a stew. Ah! it's stew terrible to even think of.

We remember once meeting a man who had just escaped by a miracle from being run over; he couldn't speak; his heart was . . . in his mouth, and he didn't appear to like it. We met him again a week after, and he told us that for the future he intended, when he got to a crossing, to . . . run over himself. Poor fellow! we trust it is still well with him.

Like which four letters of the alphabet is a honey producing insect when in small health?

Like A B C D (a bee seedy).

[Therefore, not so much of A B C B (a busy bee) as usual. Poor little insect, what N-R-G it has in working; what X-L-N-C has not its honey; and as for its N-M-E's, they ought never to be X-Q-Z, but to find out the F-I-K-C of its sting.]

No. 126.—An Ocean Wonder.

In the ocean's depths profound,
Where is heard not human sound,
Where the briny monsters play,
I am buried night and day.

Like a master working soul,
Who can myriad minds control,
Like the planets in their course,
I contain a hidden force.

'Tis the modern men of thought
That the fleeting secret caught;
When a captive it was made,
For its guidance I was laid.

Swifter than the flight of time
Flashes it from clime to clime;
Quick the distant nations hear
What you whisper in my ear.

In telling them, you'll do.

No. 137.—An Enigma in Prose.

I am such an indispensable part of your being that a mortal creature cannot exist without me. Yet I am not exclusively of an animal nature, for the earth owns me as well. I am to be met with at Vesuvius and Etna, only you would never be able to approach near enough to see me. So you must look for me in rivers, where you will always discover me (just where you will not find me in the animal kingdom), the farthest from the head. I dwell in all caves of the earth, and in all pits, whether of coal or ore. Not even a cannon is made without me, for I am where men seek the "bubble reputation." I am large and long in the shark and alligator, small in the crab and caterpillar, deep and wide in jar and jug, long and elliptic in the human race, round in the ray and the skate, and triangular in the leech. With all the animal race I am movable, generally noisy, and can open or close at will, but in inanimate nature I am generally noiseless and perpetually open. I dwell in Venice, and through my means the secret messages to the Inquisition passed! I was in Egypt with Memnon, making music when the sun touched me. In short, if the eyes are called the windows of the soul, I may be very justly considered as its portal.

 My fifth's half amused, and that's better than
 weeping;
 My sixth through a great Russian city goes
 creeping;
 My next is a tree by King Solomon prized;
 My eighth a grand virtue to which we're advised;
 My ninth's an old weapon—not sword, shield or

 My tenth is three-fifths of the first stream in
 France;
 My next brings a blush to an Austrian's face,
 And my last's a spring dose, very good in its

 To every good child in the spring of the year.

Anecdote of a Bishop's Wife.

Have you heard the tale of the bishop's wife, who, when she had been shopping, had her purchases put into her carriage, and was going away without paying until stopped by the counter gentleman. "Do you know who I am?" indignantly asked she; "I am the bishop's lady." "Can't help that mum," replied the counter gent, "you couldn't have 'em without paying for 'em if you was his wife!"

The distant and near gather under my wing.
Far swifter than lightning my wonderful flight,
Through the sunshine of day, or the darkness of night;
And those who would find me, must find me, indeed,
As this picture they scan, and this poesy read.

To Stand an Egg Upright.

The unceremonious manner in which the great navigator performed this feat by breaking one end of the egg, is familiar to all who have read the anecdote of Columbus and the egg. Evidently at that time it was considered impossible to stand an egg on its point. But a modern genius declares it may be done thus: Take an egg (a long one is best), shake it well so as to break the yolk and mix it with the white; then with a "steady hand" balance it on its broad end upon a smooth, even surface, glass or slate being best.

Several Swallows.

The proverb says "One swallow does not make spring," but the proverb is certainly wrong when the swallow is one gulp at a big boiling hot cup of tea in a railway station, as, if that one swallow does not make one spring, we should be glad to hear what does.

A traveler writes from Naples: "Standing on Castle Elmo, I drank in the whole sweep of the bay." What a swallow the writer must have.

But perhaps the queerest feat in the eating and drinking line ever recorded is that of a man who commenced by bolting a door, after which he threw up a window, and then sat down and swallowed a whole story!

With Christians I am never singly known,
Am green, or scarlet, brown, white, gray or stone.

And went with her, when she, alas! did leave.

And made Augustus Cæsar known to fame.

The poet writes me in his natal lay;
The father always gives me to each son,

It matters not if he has twelve or one;
But has he daughters?—then 'tis plainly shown
That I to them am seldom but a loan.

Curtail me, I become a slender shred,

Again complete me, next take off my head,

Again behead me, and, without dissection,

Thus: Suppose the number of points of the first die which comes up to be 2 and that of the other 3. Then if to 4, the double of the points of the first, there be added 5,

and the sum produced, 9, be multiplied by 5, the product will be 45; to which if 3, the number of points on the other die, be added 48 will be produced, from which, if 25 be subtracted, 23 will remain, the first figure of which is 2, the number of points on the first die, and the second figure 3, the number on the second die.

I was awakened this morning by a roaring water south of Conn. Running to the window to cape of the U. S. I saw it was a lake in N. A. and the roaring a bay in Mich. I hastened to river in Europe, my clothing, and then built a fire of an island in the Gulf of Mexico. Feeling mountains in N. J. I found a bottle, drew a city of the British empire and swallowed a river of the U. S. of a department of France. Going outside I found it was not only a cape of the U. S., but also a country of S. A. On looking round I saw the large body of water in British A. had broken loose, was circling and rushing around and likely to do damage. It occurred to me that I could stop the trouble with a lake of the U. S., and sure enough I soon had him a river in Kentucky and led him to a town in Mass. I then had a large city of England in a town of Minnesota, and just as I emerged from the latter heard the blowing of a South American cape. Knowing it to be a lake of Africa our South American river of all work, calling to breakfast, I hurried a river in Germany.

I've hands and feet and features fine,
To you I often tell the time;
I'm sometimes seen upon the moon,
The cattle seek me oft at noon.
Around each house I creep at night,
From me the guilty hastes his flight;
I help to prove the earth is round;
I swiftly move without a sound.
I walk with you each pleasant day;
I chase the children when at play—
They cannot catch me if they try,
Yet they are as fleet of foot as I.
I am not light, I'm sure you'd say,
And yet 'tis true I nothing weigh.
Whene'er the morn is clear and bright,
My form towers to a wondrous height;
But when the dinner hour is nigh,
More broad and short and thick am I.
If before you I proceed,
And if you wish to take the lead,
Then turn and go an opposite way,
Or wait till a different time of day.

No. 434.—A Charade.

Silence is golden, yet I am not gold,
But rather a silvery hue have, I'm told;
I live but a month, yet I rapidly grow,
And reflect in a manner that often I throw
Upon subjects beneath me a beautiful light,
And am steady, although often out late at night.
As of all the things said of me, that is the worst,
You surely can guess what I mean by my first.

My second is used in all buildings, I ween,
And likewise on steamboats, in action, I'm seen.
The yachtsmen discourse of my breadth in a way
That is apt to lead dwellers on land quite astray.
I'm found in the forest, I'm seen on the seas,
And likewise am sought for inside of tall trees.

My whole is a something transcendently light;
I hide from the sun to appear in the night,
No chemist can weigh me, I scoff at his scales.
Now all try and guess me, and notice who fails.

I'm more than one thing, that is very certain;
Sometimes I'm chafed at by the rising tide,
Then I'm a cozy room from behind a curtain,
And then a place where criminals are tried;
Then, on an oaken door, or garden gate,
Planted, I give intruding rogues checkmate.

Such am I—add but d to my short name,
Then starts a poet up, his eyes aflame;
Or, if a simple e to me you add,
I'm what you'd be if you'd lost all you had.
Give me but k, and I will cross the sea,
Or n, and I a place of store will be;
With m I help the brewer of the beer,
I pick up on, and find myself a peer.
Would you know more? With t'er I sell and buy,
With ge I carry coals; then who am I?

A Catch for the Unwary.

"Why does a pail of water with a live fish in it weigh no more than the same pail of water without the fish?" This perplexing problem is said to have puzzled that august body, the Roman senate, long years ago, and many were the ways in which its members accounted, each to his perfect satisfaction, for the singular circumstance, until one, wiser than the rest, weighed a pail of water with and without the fish, and it is needless to mention the result.

No house can be without it,
On railway journeys you'll it meet,
And porters never scout it.

I gave it to a man one day,
He thanked me fair and roundly;
Then gave it to a friend in play,
Who forthwith thrashed him soundly.

It screens the soldier in a storm,
It holds the sailor's kit;
Behind four horses when 'tis warm
I like on it to sit.

A Clever Calculation.

One person tells another, older than himself, that he can discover the difference in their ages. It can be done by the following ingenious rule: Let the younger take as many nines as there are figures in the number representing his age and, from the number thus formed, subtract his age. He

should then ask the older person to add this difference to his own age, then to take away the first figure of the amount and add it to the last figure. The result will be the difference in their ages.

Suppose Harry, 12 years old, tries it with his Uncle John.

There being two figures in 12, Harry starts with 99, from which 12 being taken there remains 87.

Supposing that Uncle John is 40, and figures honestly, he will calculate as follows: 40 added to 87 equals 127. Removing the left hand figure, 1, and adding it to the last figure, 7, the result is 28—the difference in their ages. If to 28 is added 12, Harry's age, we have 40, the age of the older person.

The Magic of Figures.

Ask a friend to open a book at random and select and mark any word within the first ten lines and within the tenth word from the end of the line. Now, letting your companion do the figuring, proceed to discover the word through "the magic of numbers." Ask him to double the number of the page and multiply the sum by 5, and then add 20.

Then to add the number of the line.
Then to add 5.
To multiply this sum by ten.
To add the number of the word in the line.
To subtract from this sum 250, and tell you the result.

The remainder will indicate in the unit column the number of the word; in the 10 column the number of the line, and the remaining figures the number of page.

Though you may not be able to explain this curious calculation it will always come out correctly.

And sent for me; said he, "I'm going to die,
Bring pen and paper here and make my will."
I did as I was bid, then, by and by,
He whispered, "I must add a codicil."
This, too, was done, and fourteen ten pound notes
Were left, and justly, to the servants three.
He who had folded up his master's coats,
And brushed his hat, had twice as much as she
Who buttered muffins for his worship's tea;
And she had thrice as much, had buxom Ann,
As the young scapegrace who errands ran,
And now 'tis plain to every thinking head
What legacy each servant pocketed.

Progressive Memory.

In this simple parlor amusement sharp eyes and a good memory are needed. A tray is brought in containing about twenty articles, such as a ring, fork, bit of ribbon, an apple, etc. The tray is placed on the center of the table for fifteen seconds, and then removed out of sight. Each one must now give a list of the articles on the tray, and the one giving the longest list scores one point. This is repeated six times (the articles being changed each time) and the highest number of points wins. Any article named which is not on the tray takes two off the score.

No. 497.—The Prisoners in the Tower.

An old king, a beautiful princess and a page were imprisoned in a high tower to which there was but one opening, a window 150 feet above the ground. The only means of escape was afforded by a rope which passed over a pulley fixed to the outside of the tower and

on each end of which hung a basket. Whenever one basket was at the window the other was on the ground below the tower. The rope itself was inclosed in such a way that a person in one of the baskets could neither help himself by means of it nor receive help from the other prisoners. In short, the only way the baskets could be used was by placing a heavier weight in the one than in the other.

Now, the old king weighed 195 pounds, the princess 105 pounds, the page 90 pounds, and they found in the tower an iron chain weighing 75 pounds. The weight in the descending basket could not exceed that in the ascending basket by more than 15 pounds without causing a descent so rapid as to be dangerous to a human being, although such a speed would of course not injure the chain. Furthermore, only two persons, or one person and the chain, could be placed in the same basket at the same time.

How did the party manage to escape and take the chain with them?

No. 512.—Riddle.

I am a creature of creation,
Used by the English speaking nation;
And nearly every one in the land
Has me at his own command.
I am like a long and jointed worm
With six-and-twenty parts,
And permeate our literature,
Our sciences and arts.
As strange a creature as I am,
One eye alone have I;
And yet I see from another place
Which is as good as an eye.
My different parts can be transposed,
And an infinite number of forms disclosed;
Or you some parts can disconnect,
Yet over me it shows no effect.
Guess me now, whoever can,
For I am used by every man.

If foot, the sacred flame

Its courage, purpose, love;

When the next foot you remove.

In a journey around the world I saw and heard many strange things. I saw a mountain of Massachusetts followed by a large insect run across two of the southern states. I saw two nations hurling an Ohio town at each other. I saw a bay of England hung up to dry. I saw a city of Germany crawling along the ground. I saw one of the British isles, with a cape of North America, sitting by a bay of Africa eating towns of New Jersey and a city of Asia. I saw two capes of the Atlantic coast so badly injured while playing with a river of North America that it was necessary to send for a lake of the same region to attend them. I heard the savage Shetland island of the North American river and the roar of an Austrian town. But when I returned to my home and told my friends of these things, they said my story was a group of islands off the coast of Great Britain. Can you show that it was not?

No. 537.—A Curious Conversation.

(Read by sound and find the names of eleven public speakers, showmen and musicians.)

Tom and I went to the menagerie last Saturday, and on the way home we had a miserable time. Reuben's tiny little dog followed us. We had just started for home when a hard shower came up, and the lightning almost made us blind. Tom and I ran for a street car. We overtook Madge, and just as Tony passed her she stepped on his fore paw and hurt him so that Tom had to carry him. It was horrid in the car, cold as a barn, umbrellas dripping all over us, and then the harness broke. The driver had to stop the car, buckle up the harness as well as he could and drive on. I thought we would not get home at all. Madge got on board, too, and the lovely bird Etta gave her for her hat was all soaked with the rain. I never saw the clouds deliver more rain in half an hour than they did that afternoon. Grandpa Pattison is old weather authority, and he never saw a harder storm. Isn't this street marked Wayne street? It is, and I must get out. Good by.

Who Wears the Ring?

A neat trick, requiring no apparatus beyond a piece of paper and a pencil, is the following:

The number of persons participating in the game should not exceed nine. Some one of the company is selected unknown to you to put a ring on one of his fingers. You now say you will tell (1) who wears the ring, (2) the hand it is on, (3) the finger of the hand, and (4) the joint of the finger.

The company being seated in regular order, the persons must be numbered 1, 2, 3, etc. The thumb must be termed the first finger, the forefinger being the second. The joint nearest the extremity must be called the first joint; the right hand is one and the left hand two.

These preliminaries arranged, leave the room in order that the ring may be placed unobserved by you. Suppose that the third person has the ring on the right hand, third finger and first joint. Your object is to discover the figures 3,131. Returning to the room, ask one of the company to perform secretly the following arithmetical operations:

1. Double the number of the person who has the ring; in the case supposed this will produce..... 6
2. Add 5..... 11
3. Multiply by 5..... 55
4. Add 10..... 65
5. And the number denoting the hand..... 68
6. Multiply by 10..... 680
7. Add the number of the finger..... 683
8. Multiply by 10..... 6,830
9. Add the number of the joint..... 6,831
10. Add 35..... 6,866

He must apprise you of the figures produced, 6,866. You will then, in all cases, subtract from it 3,535. In the present instance there will remain 3,131, denoting the person No. 3, the hand No. 1, the finger No. 3, and the joint No. 1.

How to Tell a Person's Age.

Among many ingenious schemes for telling
 a person's age this is one of the easiest and
 best. Let the person whose age is to be dis-
 covered do the figuring. Suppose, for ex-
 ample, if it is a girl, that her age is 15 and
 that she was born in August.

Let her put down the number of the month
 in which she was born and proceed as follows:
 Number of month..... 8
 Multiply by 2..... 16
 Add 5..... 21
 Multiply by 50..... 1,050
 Then add her age, 15..... 1,065
 Then subtract 365, leaving..... 700
 Then add 115..... 815

She then announces the result, 815, where-
 upon she may be informed that her age is 15
 and August, or the eighth month, is the
 month of her birth.

The two figures to the right in the result
 will always indicate the age and the remain-
 ing figure or figures the month the birthday
 comes in.

This rule never fails for all ages up to 100.
 For ages under 10 a cipher will appear pre-
 fixed in the result, but no account is taken of
 this.

Long years ago, the Portuguese
 In me rode over stormy seas,
 Held on my course 'mid pirates bold,
 Who sought to seize my freight of gold,
 Sailed on until I reached the shore
 Of India, famed in ancient lore.
 Then back I sailed, and in the hold
 Were richest spices—wealth untold—
 Which netted to the captain brave
 All riches that his heart could crave.
 Now this I'll tell: Scan well my name,
 Backward and forward I'm the same—
 A palindrome, no more or less,
 So use your wits my name to guess.

The Magic Dance.

An entertaining electrical experiment can be performed by the young folks on clear, cold winter evenings, as it succeeds best when the atmosphere is very dry. The apparatus is simple. Two large books and a pane of glass, say 10 by 12 inches in size, come first. The ends of the glass are put between the leaves of the books, so as to bring the glass about 1½ inch above the top of the table. Then take tissue paper and cut out any figure that fancy may

prompt, not to be over 1 inch or 1½ inch in length.

These figures are to be laid upon the table under the glass, and the experiment is ready to be put into practical operation. The next step is to take a silk handkerchief and rub the top of the glass with a quick circular motion. The result is to bring the figures into active life, their antics being amusing beyond description. Be careful not to touch the glass with the hand or finger during the movement of the figures, for it will stop them at once.

Four tramps applied at a farm house for alms. "Well," said the farmer, "I have a piece of work that will require 200 hours' labor. If you want to do it, I will pay you \$20, and you can divide the work and the money among yourselves as you see fit."

The tramps agreed to do the work on these conditions: "Now, boys," said one of the tramps, who was at the same time the laziest and the most intelligent of the four, "there is no use of all four of us doing the same amount of work. Let's draw lots to see who shall work the most hours a day and who the fewest. Then let each man work as many days as he does hours a day."

The plan being agreed to, the lazy tramp took good care that chance should designate him to do the least number of hours of work. Now how were the 200 hours of work allotted so that each tramp should work as many hours a day as he did days, and yet so that no two tramps should work the same number of hours?

No. 790.—Decapitation.

In the skies, a bird, I soar
 High above the ocean's roar.
 If my head you heartless take,
 As on the crags the billows break,
 I rise again above the rock
 That stands unshaken by the shock.
 Again beheaded, and I moan
 The words breathed out with many a groan
 Of shipwrecked souls. Behead once-more,
 I am a fish that shuns the shore.
 Apply the guillotine again,
 And loud assent I give : Amen !

No. 794.—One of Nature's Wonders.

'Neath ocean's foam I make my home ;
 About me much is said.
 Sometimes I'm white or very light,
 And sometimes I am red.
 Thro' many years, as it appears,
 Millions of insects small
 Their lives laid down my fame to crown,
 All glory to them all.
 But greedy man my form will scan,
 And tear me from my home.
 Thro' stranger lands in golden bands
 I'm sometimes forced to roam.
 The ladies fair, neck, arms and hair
 With me will oft adorn,
 Nor think that woe my heart would know
 Had I a heart to mourn.
 By nature's hand I'm rough as sand,
 But man will interfere,
 And change me so I scarcely know
 Myself, I feel so queer.

1. Picture puzzle—Why is a conundrum like a monkey? Answer: It is farfetched and troublesome.

2. Enigma—A leaf.

3. Arithmetical tangle—It would seem at first view that this is impossible, for how can half an egg be sold without breaking any of the eggs? The possibility of this seeming impossibility will be evident, when it is considered, that by taking the greater half of an odd number, we take the exact half plus $\frac{1}{2}$. When the countrywomen passed the first guard, she had 295 eggs; by selling to that guard 148, which is the half plus $\frac{1}{2}$, she had 147 remaining; to the second guard she disposed of 74, which is the major half of 147; and, of course, after selling 37 out of 73 to the last guard, she had still three dozen remaining.

No. 464.—Crossette:

Having crossed out one circle, miss the next three, and begin counting again from the fourth, and so on round and round. Missed circles are to include those already crossed out. Thus, if the circle marked 1 is started from, scratch out the unnumbered circle. Miss three circles, and begin counting again from 2. This count will bring the player to the circle numbered 1, which is to be crossed out. Missing three again (including the circle already crossed out) begin counting from 3, and cross out 2; and so on, until all the circles except the one numbered 9 have been crossed out.

The general rule for any number of circles, counting any number each time, is always to miss the number that will bring the next count to the circle previously started from. Thus, if there are eleven circles, and the count is five, miss two each time; if there are eleven circles, and the count is four, miss four.

This will solve all the possible cases, but some numbers do not admit of a solution, such as ten circles counting five. The reason for this is that the number of circles, and the number of the count minus one, have a common factor.

But this not being the case, let 60 multiplied by 2 and increased by 1 be tried; also 60 multiplied by 3 and 1 added, and so on, when it will be found that 5 times 60, plus 1, or 301, is divisible by 7. If to 301 we add 420 (the least common multiple of 2, 3, 4, 5, 6, 7) the sum 721 will be another answer, and by successive additions of 420 we may obtain as many answers as we like.

Out doors Jack Frost bites sharp; within—
Good! our first fire is lighted.

No. 710.—A Pleasure Trip:

MY DEAR CHARLOTTE—I have been reading, but now will tell you about our pleasant trip. We went to see Geneva. There were Elizabeth, Helena, Whitney, Chester and myself. Elizabeth wore a green merino, Helena wore Canton flannel. I had to borrow a hood, and wore a black dress. We got an early start. We went over a very rocky road. Geneva had been on the lookout for us. As you must know, Geneva is very rich, and her floors were covered with Brussels carpet. She showed us a horn basket she made; also her lovely roan pet cow. We stayed over Sunday, and then came home. My friend, I must close. I fear we shall get a hurricane.
Farewell.

EVERYBODY'S BOOK OF JOKES.

"In so large a collection there is, of course, much that is ancient, but, as the Editor remarks in his preface, your old joke is often the best; whether or no, there is a large amount of laughter for the money in the little volume."—*Glasgow Evening Times*.

"This is the best sixpenny book of fun that has yet been published. It contains more than 3,000 comicalities, both in prose and verse, the freshest bits of Yankee humour, as well as the many quips of antique times."—*Dundee Courier*.

". . . the very thing for the professional wit. . . ."—*Glasgow Herald*.

"If a merry mood contributes to health, the sixpence which this little hand-book costs will be well invested. It will prove an unfailing stimulant of mirth and laughter whenever consulted."—*Western Daily Mercury*.

"A mirth-provoking book such as this may be a better tonic than any drug. . . ."—*Stourbridge Express*.

"All the humour of an ordinary lifetime is apparently compressed within the limits of a sixpenny volume."—*Admiralty Gazette*.

"There is plenty of laughter in this little book. . . ."—*Pictorial World*.

". . . is surely the cheapest sixpennyworth of wit and humour ever issued."—*Weekly Times and Echo*.

". . . a potentiality of humour beyond the dreams even of a comic editor."—*Brighton Herald*.

"Beaming over with fun and frolic. . . ."—*Derwickshire News*.

". . . much amusement is in store for those who will pay attention to what is here accumulated, whether old or new, in prose or rhyme. They may learn some good lessons into the bargain."—*The Queen*.

"The selections are remarkably free from anything which may be construed into coarseness."—*Cornish Telegraph*.

SELECTIONS FROM
BILL NYE,
BOB BURDETTE,
AND OTHER AMERICAN HUMOURISTS.

250 ILLUSTRATIONS.

“Bill Nye is a familiar name now, and his coadjutors in this amusing little work have done their best to make themselves worthy of the association in which they find themselves.”—*Glasgow Evening News*.

“The illustrations are in the broadest style of grotesque humour, and have the double merit of being abundant and to a degree artistic.”—*Weekly Herald*.

“If Artemus Ward’s mantle fell upon anyone it was certainly the gentleman who writes himself ‘Bill Nye,’ and many of whose funniest efforts are collected in this book.”—*Whitehaven News*.

“Here is a large and closely packed shilling’s worth that, open it where you like, will drive off dull care and brighten the spirits when weary and tired.”—*Brechin Advertiser*.

“American humourists have hard and incisive points in their jokes. They are original, often highly intellectual, and not unfrequently vulgar. There are none of the latter class in the selections before us, and we find not one which can be said to be objectionable.”—*The Ulster Gazette*.

“The most extraordinary collection of stories of the true American type, and the fun is heightened by upwards of 250 illustrations.”—*Inverness Chronicle*.

JENNIE, THE CIRCUS RIDER, AND 50 OTHER SHORT STORIES.

A CHOICE SELECTION OF AMERICAN SHORT STORIES

"This is a book of wonderfully good reading. The stories are exceedingly interesting, and, as a rule, freshly written; in fact, the volume should have many attractions for English readers. The first and longest tale (they are none of them very long) is 'Jennie, the Circus Rider,' a worthy and characteristic product of the pen of that powerful and dramatic writer, M. French-Sheldon."—*Western Times*.

"The opening story is one of tragical interest."—*Reynolds's Newspaper*.

"The volume is quite a fireside companion."—*Staffordshire Times*.

Crown 8vo, 400 pp., Paper, 1s. 6d.

HERBERT SEVERANCE.

A New Novel by M. French-Sheldon.

"A story which will take high rank amongst those works of fiction which are designated as books worth reading."—*European Mail*.

"Dramatic effect is not lacking, and nothing more striking in its weirdness could be well conceived than the scene pictured in the last chapter."—*Ayrshire Post*.

"A novel that will hold its own with some of the best in the book market of 1889."—*St. Stephen's Review*.
