**Availability: Available Soon**

**Price: \$80**

In response to occasional requests for the Hectix puzzle, we are now making a new version of this puzzle. We went looking for the most difficult and interesting version of this interlocking burr. We looked for a set of pieces satisfying the following:

- 1 - Use as many different pieces as possible
- 2 - Only one solution
- 3 - Many assemblies
- 4 - As difficult to disassemble as possible

Hectix Revisited is the result.
