

Twenty Cube

Designed by John Devost, made by Rick Eason 2007.

(Bocote and Cherry, 4 pieces, 2.4 inches square;
as described on *Rick Eason's Page*, this puzzle was also mass produced as
"Confusion Puzzle Mental Block" shown on the right above - wood 2.9" square)

Four pieces formed from unit cubes and rods of dimensions $\frac{1}{2}$ by $\frac{1}{2}$ by 2.5 units. The photos below show the four pieces positioned to be assembled, and pairs put together; the final step slides these two halves together to get the solved cube shown above.
