

Touchdown

K&T Toys, Inc., purchased 2007.
(plastic, 3.5 inches diameter by 6.5 inches long)

This is the "Limited Edition Patriotic Version"; this puzzle was also made with brown body. The directions give three increasingly hard challenges:

1. Move the football from one side to the other.
2. After mixing up the puzzle (e.g., after completing Challenge 1), return all the players to their respective sides (the end caps specify the red and blue sides of the puzzle).
3. Put the players into their correct sequentially numbered positions.

This puzzle can be solved in a fashion similar to the *Fifteen* puzzle (and a similar parity argument applies).
