

# Circus Seven

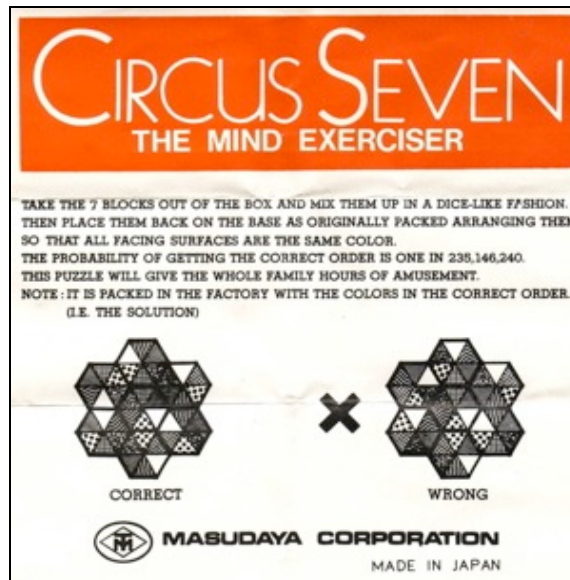

**a.k.a. *Mind Exerciser***

*Masudaya, Japan, circa 1980's?*

(4.25" by 1.75" high plastic box and seven hexagonal plastic pieces)

Arrange the seven hexagons so that adjacent edges match. Like the *Circus Puzzler*, but a larger size puzzle with different color patterns. This is the same puzzle as *Drive Ya Nuts* (the colors red, green, blue, yellow, white, and orange correspond to the numbers 1 through 6).
