## A TRADITION OF EXCELLENCE

Founded in the original Water Power District of Rockford, Illinois, Rockford Foundries has built a tradition of excellence by requiring the highest quality in production and services to clients. An outgrowth of the Rockford Standard Pattern Works established in the early 1930s, the facility was converted to a fully operational foundry in 1967.

With over 40 years of hands-on experience, the family-owned business has continued to develop their reputation for total quality through metallurgical knowledge, technical capability, responsiveness, quality control, on-time performance, cost awareness and versatility. Many original customers continue to profit from their expertise...proof that Rockford Foundries' commitment to quality products and customer service has only been strengthened through time.
