### The Tormentor.

To arrange these eight stones in 158 shapes as shown by the designs on pages 1 to 48, inclusive; to make all the letters of the alphabet and a variety of other forms, some of them queer and fantastic, seems beyond human ingenuity and in fact, it is pretty hard, but head-work and persistency will accomplish it. It is necessary to use every stone in every puzzle, and to be sure you reproduce the figure in the book exactly. From 159 on you need two puzzles, viz.: 159 to 162, Tormentor and Circular; 163 to 166 Tormentor and Anchor; 167 to Quäl. 170, Tormentor and Cross; 171 to 174 Tormentor and Pythagoras. All the stones in the two boxes must be used in the combination-puzzles.

As often as you solve a puzzle, it is well to mark the positions of the stones on the printed figure in the book. Should you desire an unmarked book, so that your friends may not have the benefit of your own hard work, we will send it.

There are also ready-made keys to be had.

Other puzzles, quite different from the Tormentor and from each other are: Anchor, Be Quiet, Columbus, Lightning Conductor, Pythagoras, Cross, Not too Hasty, Sphinx, Circular, Goblin, Patience Prover, The Nine, Trouble Killer, Wrath Breaker, Heart Puzzle, Magic - Egg.

(cardboard box 3.1 by 3.1 by 1/2 inches, 8 stone pieces, and booklet; inside of the box cover shows how to pack the pieces into the box; booklet has the same 64 pages with 174 shapes as the puzzle shown on the first page, where the two sided instruction sheet describes the puzzle)
