

Super Skewb Diamond

a.k.a. *Diamond Octahedron*

Purchased from the Cuber Shop, Tiawan, 2009.

(plastic, 2.25 inches between faces, 4 inches point to point,
opposite faces are white / yellow, orange / black, magenta / blue, green / red)

A larger version of the *Skewb Diamond*; this is a different puzzle than the *Octahedron*. Rotation is not about the points of the diamond; rather it is along each of the four sets of two planes that divide the puzzle between opposite faces:
