

Eight Puzzle

"*Super Solitaire*", Roalex Co., Forest Hills, NJ, circa 1950's and 1960's.
 (puzzle is held by sleeve in back and not glued to the card;
 card is $5\frac{1}{4}$ x $4\frac{1}{8}$ ",
 puzzle excluding the keychain loop is plastic $1\frac{3}{8}$ x $2\frac{3}{8}$ " by $\frac{7}{32}$ ")

Since the *Fifteen* puzzle can be solved by easily arranging the first two rows and then solving the last two rows, this puzzle captures most of that puzzles (limited) complexity.
