

Vortex

*Cast Puzzles, Copyright Hanayama Co. 2008.
(metal, 2 inches)*

Three spiral shaped pieces with carefully placed bumps and cuts on them (in different places for the three pieces) slide together. Although they feel loosely linked together when holding the puzzle assembled, the fit is very exact when disassembling or assembling (a little bit of force is required to make the puzzle spring loose on the first disassembly step or back together on the last assembly step).
