Celebrating its 26th annual edition, the Data Compression Conference (DCC) is an international forum for current work on data compression and related applications. The conference addresses coding methods for specific types of data (text, images, video, audio, medical data, scientific data, biological sequences, graphics data, web content, etc.) and the application of techniques from information theory and data compression to networking, communications, storage, and search (including image and information mining/retrieval, archiving and backup, human-computer interfaces, compressed data structures, visual search, object recognition, compressive sensing, rate-distortion coding, rate allocation, and compression-related standards). Both theoretical and experimental work is of interest.

**Paper Submission:**
Prospective authors are invited to submit papers of not more than ten (10) pages including all references, figures, tables, notes, and appendices. Papers are due by **November 2, 2015**, and must be submitted electronically.

**Keynote Address:**
"HEVC: Recent Developments and Future Trends"—Speaker to be announced

**Special Sessions:**
- "Recent Developments in Video Coding: High Dynamic Range, Wide Color Gamut, and Future Compression Technology"—Yan Ye, Gary Sullivan, Ji-Zheng Xu, Giovanni Motta, special-session chairs
- "Compressed Data Structures"—Gonzalo Navarro and Travis Gagie, special-session chairs
- "Genome Compression"—Jiangtao Wen, Khalid Sayood, Claudio Alberti, Ioannis Xenarios, Jaime Delgado, and Marco Mattavelli, special-session chairs

Authors may designate their paper for consideration for a special session at the time of submission; special-session submissions will be subject to the regular review process.

Further conference information and details on the electronic-submission process are available at: [http://www.cs.brandeis.edu/~dcc/](http://www.cs.brandeis.edu/~dcc/)
