

PROGRAM

Data Compression Conference (DCC 2017)

*Sponsored by U. Arizona, Brandeis U., Microsoft Research, IEEE Signal Processing Society
Proceedings published by IEEE Computer Society Conference Publishing Services (CPS)*

Snowbird, Utah, April 4 - April 7, 2017

PROGRAM COMMITTEE

Michael W. Marcellin, *University of Arizona (DCC Co-Chair)*
James A. Storer, *Brandeis University (DCC Co-Chair)*
Ali Bilgin, *University of Arizona (Committee Co-Chair)*
Joan Serra-Sagrista, *U. Autònoma de Barcelona (Committee Co-Chair)*
Henrique Malvar, *Microsoft Research (Publications Chair)*
James E. Fowler, *Mississippi State University (Publicity Chair)*
Charles D. Creusere, *New Mexico State University*
Travis Gagie, *University of Helsinki*
Hamid Jafarkhani, *University of California Irvine*
Alistair Moffat, *The University of Melbourne*
Giovanni Motta, *Google, Inc.*
Gonzalo Navarro, *University of Chile*
Antonio Ortega, *University of Southern California*
Jan Ostergaard, *Aalborg University*
Majid Rabbani, *Eastman Kodak Co.*
Yuriy Reznik, *Brightcove, Inc.*
Thomas Richter, *University of Stuttgart*
Victor Sanchez, *University of Warwick*
Serap Savari, *Texas A&M University*
Khalid Sayood, *University of Nebraska*
Rahul Shah, *Louisiana State University*
Dana Shapira, *Ariel University*
Ofar Shayevitz, *Tel Aviv University*
Dafna Sheinwald, *IBM Haifa Lab*
Gary J. Sullivan, *Microsoft Corporation*
Jiangtao Wen, *Tsinghua University*
Ji-Zheng Xu, *Microsoft Research*
En-Hui Yang, *University of Waterloo*
Yan Ye, *Interdigital, Inc.*

SCHEDULE OVERVIEW:

Tuesday Evening, April 4:

Registration and Reception (7pm - 10pm)

Wednesday, April 5:

Morning: Technical Sessions 1,2,3 (8:00am - 12:20pm)
Mid-Day: Keynote Speaker (2:00pm - 3:30pm)
Afternoon: Technical Sessions 4,5 (4:00pm - 7:00pm)

Thursday, April 6:

Morning: Technical Sessions 6,7,8 (8:00am - 12:20pm)
Mid-Day: Keynote Speaker (2:00pm - 3:30pm)
Afternoon: Poster Session and Reception (4:00pm - 7:00pm)

Friday, April 7:

Morning & Mid-Day: Technical Sessions 9,10,11,12 (8:00am - 1:20pm)

TUESDAY EVENING

Registration / Reception, 7:00-10:00pm (Golden Cliff Room)

WEDNESDAY MORNING

SESSION 1, *Video Coding, Part 1*

- 8:00am:** Spatially Scalable HEVC for Layered Division Multiplexing in Broadcast 3
Kiran Misra¹, Andrew Segall¹, Jie Zhao¹, Seung-Hwan Kim¹, Joan Llach², Alan Stein², John Stewart², Hendry³, Ye-Kui Wang³, Yan Ye⁴, and Yong He⁴
¹Sharp Labs Of America, ²Technicolor, ³Qualcomm, ⁴Interdigital
- 8:20am:** Conversion and Coding Practices for HDR/WCG ICTCP 4:2:0 Video..... 13
Taoran Lu, Fangjun Pu, Peng Yin, Tao Chen, and Walt Husak
Dolby Laboratories
- 8:40am:** Effective Quadtree Plus Binary Tree Block Partition Decision
for Future Video Coding..... 23
Zhao Wang¹, Shiqi Wang², Jian Zhang¹, Shanshe Wang¹, and Siwei Ma¹
¹Peking University, ²Nanyang Technological University
- 9:00am:** Adaptive Clipping in JEM..... 33
Franck Galpin, Philippe Bordes, and Fabien Racape
Technicolor

Break: 9:20am - 9:40am

SESSION 2, *Quality Metrics and Perceptual Compression, Part 1*

- 9:40am:** Measure and Prediction of HEVC Perceptually Lossy/Lossless
Boundary QP Values 42
Qin Huang¹, Haiqiang Wang¹, Sung Chang Lim², Hui Yong Kim², Se Yoon Jeong², and C.-C. Jay Kuo¹
¹Univ. Southern California, ²Elec. and Tele. Research Institute
- 10:00am:** Recover Subjective Quality Scores from Noisy Measurements..... 52
Zhi Li¹ and Christos G. Bampis²
¹Netflix, ²Univ. of Texas at Austin
- 10:20am:** Influence of Dead Zone Quantization Parameters in the R/D Performance
of Wavelet-Based Image Encoders 62
Miguel O. Martínez-Rach, Pablo Piñol, Otoniel López-Granado, and Manuel P. Malumbres
Miquel Hernández University

Break: 10:40am - 11:00am

SESSION 3

- 11:00am:** A Compact Index for Order-Preserving Pattern Matching 72
Gianni Decaroli¹, Travis Gagie², and Giovanni Manzini³
¹University of Eastern Piedmont, ²Diego Portales University and CEBIB,
³IIT-CNR
- 11:20am:** Complementary Contextual Models with FM-Index for DNA Compression..... 82
Wenjing Fan¹, Wenrui Dai², Yong Li¹, and Hongkai Xiong¹
¹Shanghai Jiao Tong Univ., ²University of California, San Diego
- 11:40am:** Improved Parallel Construction of Wavelet Trees and Rank/Select Structures... 92
Julian Shun
University of California, Berkeley
- noon:** Full Compressed Affix Tree Representations 102
Rodrigo Cánovas and Eric Rivals
Université de Montpellier

Wednesday Lunch Break: 12:20pm - 2:00pm

WEDNESDAY MID-DAY

Kenote Speaker

2:00pm - 3:30pm

Visual Quality Metrics

Scott Daly

Senior Member Technical Staff, Dolby Laboratories

Abstract:

In a recent paper*, over 30 visual quality metrics were assessed against a subjective dataset. Why so many? While complexity criteria and the creativity of the metric designers is an obvious answer, there are also important business-dependent factors. For example, mature businesses offering high quality products/services are more interested in carefully quantifying performance around a visually lossless goal, while nascent businesses offering a new imaging convenience to the market are generally more interested in describing quality over a wider range of distortions. Currently, it is difficult to have accuracy at the threshold as well as the ability to describe the entire range of appearance. Such difficulty has roots in the threshold vs. suprathreshold performance of the visual system, where one example is that the luminance nonlinearity that results in uniform detection is different from the one that describes lightness appearance*. Another is that the CSF (Contrast Sensitivity Function, ~ an MTF) changes shape as distortions become visibly larger. These fundamental aspects of human vision manifest into not only different types of metric algorithms, but also different methodologies required for subjective testing. In addition to the distinction between visually lossless vs. visual lossy, there is a key distinction between metrics that are signal-dependent, such as commonly used for codec assessment, and those that are traditionally signal-independent, such as those used to characterize displays. While these arenas have been largely disjoint for many decades, the proliferation of widely varying display capabilities means that codec or other image processing quality assessment is substantially linked to the actual display. Some businesses are able to take advantage of such linking, while others are not. The recent development of HDR displays and signal ecosystems enabling metadata means that OTT (internet delivery of content) businesses are able to take advantage of such linking while traditional businesses such as broadcasting are hesitant. This recency is exemplified in that only two of the metrics studied above were capable of being calibrated to the display. The concept of Signal Known Exactly (SKE) affects whether perceptually transparent or merely structural similarity is needed for specific businesses, and thus effect whether reference-based or no-reference metrics are most applicable. For example, user-generated content puts specific demands on certain features that doesn't occur with professionally produced content. However, professional content having narrative intentions brings up the related concept of Signal Expressed Exactly. In addition to the physics of the display and the psychophysics of human viewer, the statistics of the imagery must also be considered. Further philosophical issues include non-ergodic imagery, entropy vs. sensation, and technological acclimatization which requires consideration of "better than excellent".

[2] Hillis and Brainard JOSA 2007

WEDNESDAY AFTERNOON

SESSION 4

- 4:00pm:** Low Complexity Prediction Model for Coding Remote-Sensing Data with Regression Wavelet Analysis 112
Naoufal Amrani¹, Joan Serra-Sagristà¹, and Michael Marcellin²
¹Universitat Autònoma de Barcelona, ²Univ. of Arizona
- 4:20pm:** Error Bounds for HDR Image Coding with JPEG XT 122
Thomas Richter
University of Stuttgart
- 4:40pm:** Pseudo Sequence Based 2-D Hierarchical Coding Structure for Light-Field Image Compression..... 131
Li Li¹, Zhu Li¹, Bin Li², Dong Liu³, and Houqiang Li³
¹University of Missouri-KC, ²Microsoft Research Asia, ³USTC
- 5:00pm:** Signal Recovery in Compressive Sensing via Multiple Sparsifying Bases..... 141
U. L. Wijewardhana¹, E. Belyaev², M. Codreanu¹, and M. Latva-Aho¹
¹University of Oulu, ²Technical University of Denmark
- 5:20pm:** Compressed Sensing Performance of Binary Matrices with Binary Column Correlations 151
Weizhi Lu, Tao Dai, and Shu-Tao Xia
Tsinghua University

Break: 5:40pm - 6:00pm

SESSION 5

- 6:00pm:** Marlin: A High Throughput Variable-to-Fixed Codec Using Plurally Parsable Dictionaries 161
Manuel Martinez¹, Monica Haurilet¹, Rainer Stiefelhagen¹, and Joan Serra-Sagristà²
¹Karlsruhe Institute of Technology, ²Universitat Autònoma de Barcelona
- 6:20pm:** Space-Efficient Re-Pair Compression 171
Philip Bille, Inge Li Gørtz, and Nicola Prezza
Technical University of Denmark
- 6:40pm:** Improvements on Re-Pair Grammar Compressor 181
Michał Gańczorz and Artur Jeż
University of Wrocław

THURSDAY MORNING

SESSION 6, *Video Coding, Part 2*

- 8:00am:** Cluster Adapted Signalling for Intra Prediction in HEVC 191
Kevin Reuzé¹, Pierrick Philippe¹, Wassim Hamidouche², and Olivier Déforges²
¹Orange Labs, ²IETR/INSA
- 8:20am:** Fast Intra Coding Implementation for High Efficiency Video Coding (HEVC) 201
Xin Lu¹, Nan Xiao², Graham Martin³, Yue Hu¹, and Xuesong Jin⁴
¹Harbin Inst. of Tech., ²Univ. of Warwick, ³Harbin Univ. of Commerce
- 8:40am:** Intra Prediction Using Multiple Reference Lines for Video Coding 221
Jiahao Li¹, Bin Li², Jizheng Xu², and Ruiqin Xiong¹
¹Peking University, ²Microsoft Research Asia

Break: 9:00am - 9:40am

SESSION 7, *Quality Metrics and Perceptual Compression, Part 2*

- 9:40am:** Reduced Reference Image Quality Assessment Based on Entropy
of Classified Primitives 231
Zhaolin Wan¹, Yutao Liu¹, Feng Qi², and Debin Zhao¹
¹Harbin Inst. of Tech., ²Inst. of Computing Tech.
- 10:00am:** Revisiting Perceptual Distortion for Natural Images:
Mean Discrete Structural Similarity Index 241
Christopher Hillar¹ and Sarah Marzen²
¹Univ. of California, Berkeley, ²Massachusetts Inst. of Tech.
- 10:20am:** Semantic Perceptual Image Compression Using Deep Convolution Networks .. 250
Aaditya Prakash, Nick Moran, Solomon Garber, Antonella Dilillo, and James Storer
Brandeis University

Break: 10:40am - 11:00am

SESSION 8

- 11:00am:** Compressed Dynamic Range Majority Data Structures 260
Travis Gagie^{1,2}, Meng He³, and Gonzalo Navarro^{2,4}
¹Diego Portales Univ., ²CeBiB, ³Dalhousie Univ., ⁴Univ. of Chile
- 11:20am:** A Succinct Data Structure for Multidimensional Orthogonal Range Searching 270
Kazuki Ishiyama and Kunihiko Sadakane
The University of Tokyo
- 11:40am:** Stabbing Colors in One Dimension 280
Arnab Ganguly¹, Wing-Kai Hon², and Rahul Shah³
¹Louisiana State Univ., ²National Tsing Hua Univ., ³National Science Foundation
- noon:** Streaming k -Mismatch with Error Correcting and Applications 290
Jakub Radoszewski¹ and Tatiana Starikovskaya²
¹Univ. of Warsaw, ²Univ. Paris-Diderot

Thursday Lunch Break: 12:20pm - 2:00pm

THURSDAY MID-DAY

Kenote Speaker

2:00pm - 3:30pm

Advances and Challenges in Imaging from Space

M. Dirk Robinson

Engineering Manager, Terra Bella @ Google

Abstract:

Traveling at speeds over 7 kilometers per second, a satellite provides a unique opportunity to observe the patterns of change on our planet. At Terra Bella, we build and operate a constellation of earth imaging satellites to collect imagery about our physical world and provide unique data services to our users. After a brief introduction to the basics of earth imaging satellites, we will describe several of the unique challenges of imaging from space including collecting, transporting, and processing large quantities of data. We will describe the innovative Terra Bella imaging architecture we use to collect and process high quality imagery and video at very low cost. We will conclude with several of the open challenges for the research community.

POSTER SESSION AND RECEPTION

4:00pm - 7:00pm

In the Golden Cliff Room.

(Titles are listed at the end this program; abstracts of each presentation appear in the proceedings.)

FRIDAY MORNING

SESSION 9

8:00am: Compression of Deep Neural Networks for Image Instance Retrieval..... 300

*Vijay Chandrasekhar^{1,4}, Jie Lin¹, Qianli Liao³, Olivier Morère², Antoine Veillard²,
Lingyu Duan⁵, and Tomaso Poggio³*

¹Inst. for Infocomm Research, Singapore, ²Univ. Pierre et Marie Curie,
³Massachusetts Inst. of Tech., ⁴Nanyang Technological Univ., ⁵ Peking Univ.

8:20am: Universal Source Coding of Deep Neural Networks..... 310

Sourya Basu¹ and Lav R. Varshney²

¹Univ. of Illinois at Urbana-Champaign, ²Indian Inst. of Tech. Kanpur

8:40am: An Asymmetric Difference Multiple Description Gaussian Noise Channel..... 320

Jan Østergaard¹, Yuval Kochman², and Ram Zamir³

¹Aalborg University, ²Hebrew University of Jerusalem, ³Tel Aviv University

Break: 9:00am - 9:20am

SESSION 10, *Genome Compression*

9:20am: GeneComp, a New Reference-Based Compressor for SAM Files 330

Reggy Long¹, Mikel Hernaez¹, Idoia Ochoa^{1, 2}, and Tsachy Weissman²

Stanford University¹, Univ. of Illinois at Urbana-Champaign²

9:40am: Statistical Compression of Protein Folding Patterns
for Inference of Recurrent Substructural Themes..... 341

*Ramanan Subramanian¹, Lloyd Allison¹, Peter J. Stuckey²,
Maria Garcia de la Banda¹, David Abramson³, Arthur M. Lesk⁴,
and Arun S. Konagurthu¹*

¹Monash University, ²University of Melbourne, ³University of Queensland,
⁴Pennsylvania State University

Break: 10:00am - 10:20am

SESSION 11

10:20am: LZ-End Parsing in Compressed Space 351

Dominik Kempa and Dmitry Kosolobov

University of Helsinki

10:40am: Improved Queryable Representations of Rasters 361

Alejandro Pinto¹, Diego Seco¹, and Gilberto Gutiérrez²

Univ. de Concepción, Universidad del Bío-Bío

11:00am: An LP Upper Bound for Rate Distortion with Variable Side Information 371

Sinem Unal¹ and Aaron B. Wagner²

¹KenCast Inc., ²Cornell University

11:20am: Globally Variance-Constrained Sparse Representation for Rate-Distortion
Optimized Image Representation..... 381

*Xiang Zhang¹, Siwei Ma¹, Zhouchen Lin¹, Jian Zhang¹, Shiqi Wang²,
and Wen Gao¹*

¹Peking University, ²Shanghai Jiao Tong University, ³Nanyang Tech. University

Break: 11:40am - noon

FRIDAY MID-DAY

SESSION 12, *Video Coding, Part 3*

- noon:** Frame Rate Up-Conversion Based Motion Vector Derivation for Hybrid Video Coding..... 391
Xiang Li, Jianle Chen, and Marta Karczewicz
Qualcomm Technologies, Inc
- 12:20pm:** Temporal Prediction of Motion Parameters with Interchangeable Motion Models 401
Cordula Heithausen, Maria Meyer, Max Bläser, and Jens-Rainer Ohm
RWTH Aachen University
- 12:40pm:** A Novel Deep Learning-Based Method of Improving Coding Efficiency from the Decoder-End for HEVC..... 411
Tingting Wang, Mingjin Chen, and Hongyang Chao
Sun Yat-sen University
- 1:00pm:** Compact Deep Invariant Descriptors for Video Retrieval..... 421
Yihang Lou¹, Yan Bai¹, Jie Lin³, Shiqi Wang^{2,3}, Jie Chen^{1,4}, Vijay Chandrasekhar^{2,3}, Ling-Yu Duan^{1,4}, Tiejun Huang^{1,4}, Alex Chichung Kot^{2,4}, and Wen Gao^{1,4}
¹Peking University, ²Nanyang Tech. University, ³Inst. for Infocomm Research,
⁴NTU-PKU Joint Research Institute

Poster Session

(listed alphabetically by first author)

- Adaptive Transforms for Inter-Predicted Residuals in Post-HEVC Video Coding 433
Thibaud Biatek^{1,2}, Victorien Lorcy¹, and Pierrick Philippe^{1,3}
¹IRT b<>com, ²TDF, ³Orange Labs
- Optimization of Sample Adaptive Band Offset in HEVC 434
Ya Chen¹, Philippe Bordes², Tangi Poirier², and Fabien Racape²
¹RWTH Aachen-University, ¹Technicolor
- Symmetry-Compressible Graphs..... 435
Uroš Čibej and Jurij Mihelič
University of Ljubljana, Slovenia
- Convolutional Neural Networks Based Intra Prediction for HEVC 436
Wenxue Cui, Tao Zhang, Shengping Zhang, Feng Jiang, Wangmeng Zuo, Zhaolin Wan, and Debin Zhao
Harbin Inst. of Technology
- Spike Camera and Its Coding Methods 437
Siwei Dong, Tiejun Huang, and Yonghong Tian
Peking University
- Adaptive High Efficiency Video Coding Based on Camera Activity Classification 438
Gangadharan Esakki, Venkatesh Jatla, and Marios S. Pattichis
The University of New Mexico
- Probabilistic Graphical Model Based Fast HEVC Inter Prediction 439
Meiyuan Fang and Jiangtao Wen
Tsinghua University
- Rate-Distortion Optimization for Video Coding under Given Computational Complexity 440
Junkai Feng¹, Saiping Zhang¹, Fuzheng Yang¹, and Shuai Wan²
¹Xidian University, ²Northwestern Polytechnical University
- Making Compression Algorithms for Unicode Text 441
Adam Gleave and Christian Steinruecken
University of Cambridge
- SATD Based Fast Intra Prediction for HEVC 442
Jiawen Gu, Minhao Tang, and Jiangtao Wen
Tsinghua University
- Geometry Padding for Motion Compensated Prediction in 360 Video Coding 443
Yuwen He, Yan Ye, Philippe Hanhart, and Xiaoyu Xiu
