

# Artificial Intelligence in Music and Art

*The application of AI techniques in the fields of art and music is a significant and captivating research area. There is a growing interest in applications of AI in visual arts, music, graphics, video, sound, architecture, design of artifacts, and other creative endeavors. The Artificial Intelligence in Music and Art track provides an international forum for researchers, scientists, and practitioners to present results from on-going AI work in the fields of music and art. The objective of this track is to foster the creation, refinement and transfer of such ideas, and to promote their cross-fertilization over all AI paradigms and relevant application domains.*
