The Rules of Nine Mens Morris

These rules are provided by Masters Traditional Games, an Internet shop selling quality traditional games, pub games and unusual games. We publish free game rules in order to promote game playing around the world. To find out more, visit the website www.mastersgames.com or email custserv@mastersgames.com.

You are welcome to print, copy or pass these rules on but only in their original form including the copyright and the information about Masters Traditional Games. The disclaimer on the Masters Traditional Games website applies.

These rules are comprehensive instructions for friendly play. They are not a complete set of standard regulations encompassing all situations that might be encountered. If in doubt, players should always abide by locally-played or house rules.

Equipment

The game of Nine Mens Morris or Mill is played on a board consisting of three concentric squares connected by lines from the middle of each of the inner square's sides to the middle of the corresponding outer square's side. Pieces are played on the corner points and on the points where lines intersect so there are 24 playable points. Accompanying the board, there should be 9 black pieces and 9 white pieces usually in the form of round counters.

Preparation and Objective

The basic aim of the game is to make "mills" - vertical or horizontal lines of three in a row. Every time this is achieved, an opponent's piece is removed, the overall objective being to reduce the number of opponent's pieces to less than three or to render the opponent unable to play. To begin with the board is empty.

Basic Play

Player's toss a coin to decide who will play white - white moves first and has a slight advantage as a result. Play is in two phases. To begin with, players take turns to play a piece of their own colour on any unoccupied point until all eighteen pieces have been played. After that, play continues alternately but each turn consists of a player moving one piece along a line to an adjacent point.

During both of these phases, whenever a player achieves a mill, that player immediately removes from the board one piece belonging to the opponent that does not form part of a mill. If all the opponents pieces form mills then an exception is made and the player is allowed to remove any piece. It is only upon the formation of a mill that a piece is captured but a
player will often break a mill by moving a piece out of it and then, in a subsequent turn, play the piece back again, thus forming a new mill and capturing another piece.

Captured pieces are never replayed onto the board and remain captured for the remainder of the game. The game is finished when a player loses either by being reduced to two pieces or by being unable to move.

Variations

Sometimes a "wild" rule is played for when a player is reduced to only three pieces. In this case, any player with only three pieces remaining is allowed to move from any point to any other point on the board regardless of lines or whether the destination point is adjacent.

Alternative board layouts have been used over the centuries. One common pattern adds four extra diagonal lines to the basic board outlined above, the lines being drawn from the corners of the inner square to the corners of the outer square. Pieces can be moved and mills made along these extra lines in the usual way.
