Rubik 1x2x5

a.k.a. Gari Garikun Puzzle
Purchased 2012.
(plastic, 3.9" x 1.5" x 3/4" inches)

A mechanically fun and not too hard puzzle, although the graphics can make it confusing to look at it mixed up and determine what needs to be done. Jaap's Page presents a solution that first solves the edges and then the corners.
