

118X

Designed and made by Stewart Coffin, 2010.
(wood, 3.25" by 1.75" high, each pod is 1.5" between parallel faces;
signed on the inside;
one of 4 puzzles purchased during a visit with the designer in 2014)

The name of this puzzle appears to come from the *Three Bunnies puzzle*, which has the same size and shape and is 118 in the author's new numbering system in the *Coffin AP-ART book*.
