

# Double Disaster

*KMS Industries, Alexandria, VA, 1968.*  
(plastic, 1.75 inches;  
directions are in the bottom)

Take the eight cubes out of the case and arrange them in a single 2x2x2 cube to make different patterns. The cubes have one of the colors *red*, *blue*, *green*, and *white* on each face. The card that is in the bottom of the cage challenges give a number of challenges, including making each face showing all four colors:

<p>After you've solved <b>"Double Disaster,"</b> try <b>"Nice Cubes"</b> and <b>"Mental Blocks."</b></p> <p>FUNTASTIC DIVISION KMS Industries P.O. Box 9170 Alexandria Virginia 22304 © 1968 FUNTASTIC, ALEX., VA.</p>	<p style="text-align: right;">TM</p> <p><b>Double Disaster</b></p> <p>Take a good look! As Double Disaster comes to you, four different colors show on every one of the six faces of the puzzle. Mix the eight cubes and put them back together again—with four different colors showing on each face.</p>
<p>If you thought that was simple, check to see if you have four different colors when you separate the eight cubes, holding four in each hand.</p> <p>If you've solved the puzzle that way, try putting Double Disaster together so that only one color shows on each face. Now</p>	<p>try the puzzle without yellow showing. Try it without red. Can you hide blue and white?</p> <p>If you're unable to work the puzzle, send us a self-addressed and stamped envelope and we'll be happy to send you the solutions.</p> <p style="text-align: right;"><b>No. 819</b></p>
