SIX SPOT CUBE

[Browse All Six-Sided: Cube \(Shape Preserving\)](#) [Search Museum](#) [Add New Item](#)

A contour cut variant of the Ivy Cube.

- **Inventor:** [David Pitcher](#)
- **Mechanism:** [Pyraminx](#)
- **Patents:** *Unknown*
- **Producer:** [3D-printing service](#)
- **Year:** [2017](#)
- **Original Price:** \$0.00 **USD**
- **Current Price:** *No Data*

Six Spot Cube is the Ivy Cube (in the museum under the name "Eye Skewb") in disguise. Mechanically and solving-wise it is the same puzzle, but the contoured cuts create a spot pattern on each face of the puzzle, adding a bit of mystery as to how the puzzle moves. Edge length: 57 mm

Above: Solved
