Four Piece Jigsaw Cube

3D print design by Hvmhvm, http://www.thingiverse.com/thing:1645742, 2016. fabricated on a Monoprice V2 printer in 2021, PLA plastic, scale 95%, infill 22%, resolution 0.175mm, four pieces, assembled printed size 1.5" square)

Here are the other three sides of the assembled puzzle:

The pieces can be paired in either of two ways, and then the two halves slide together:
