

Wonder Puzzle Block

THE "WONDER" PUZZLE BLOCK

Take it apart; mix the pieces and see how soon you can put them together again in the form of a block.

DIRECTIONS: There are three sections of three pieces in each section.

1st. The largest piece and 2 T-shaped pieces form the center section of the puzzle.

2nd. The 3 oval shaped pieces form one outside section.

3rd. The 3 hollow shaped pieces form the second outside section. When sections are formed together the block will be complete.

CAUTION  The saw cutting thru the block gives each piece the proper clearance. It is not necessary to use any force or pressure. When the proper piece is found it will fit in its proper place quite easily.
