Nine Puzzle

A smaller version of the *Fifteen Puzzle*. Although relatively easy, graphics on the pieces tend to make solving more difficult than if the pieces were the numbers 1 through 8.

*Superman*

(plastic, 9" square by 3/8" thick)

*Copyright J. A. Storer*
**Tweety Version of the Nine Puzzle**

![Tweety Puzzle Image]

**Tweety Bird**

Card back reads: *Copyright DaMert Company, Berkeley CA, 1997.*

(plastic with raised graphics, 4" square by 1/4" thick tray, on an 8" x 5.5" cardboard card; taking into account the raised graphics the puzzle is 3/4" thick;"

*Copyright J. A. Storer*
Gecko Version of the Nine Puzzle

The copyright shown on the back of this puzzle (photo above) is 1993, 4 years earlier than the Tweety version, and shows the patent pending. DaMert made a number of these sliding puzzles all the same size, where some had copyrights in the intervening time, such as the Turtle puzzle (copyright DaMert 1994, San Leandro, CA) and the Earth-Moon puzzle (copyright DaMert 1996, Berkeley, CA).
More Examples of the Nine Puzzle
